ROCKING THE LATEST LOOKS WITH TEXAS COUNTER FITTERS

Designers and homeowners alike love natural stone for its inherent beauty, versatility and timelessness – a trifecta of benefits that adds style and character to any décor. Here's our take on what's trending this season.

Bookmatching is a technique where two slabs of stone are arranged to mirror each other, creating a symmetrical, visually stunning effect. Patterns with strong movement and veining are best suited; use for feature walls, floors and countertops.

Just a stone's throw away, the Texas Counter Fitters Showroom (above) features thousands of stone slabs, each hand-selected and meticulously crafted to meet the very highest standards.

Sustainably-minded stone is sourced from responsible quarries and processed with minimal waste and energy. As more people become conscious of the environmental impact of their choices, they're opting for natural stone slabs that are eco-friendly, ethical and durable.

Artistic, statement stone is having a moment – think striking patterns, strong veining and vibrant colors. Among the newest hues: beautiful blues, rich greens and bold golds.

Mixing and matching different types of stone creates a dramatic effect. Add a statement island to a kitchen with simple countertops or create interesting texture dynamics by mixing a smooth stone like polished granite with rough-hewn slate.
